GFK Weighing Scales

The GFK offers all the features needed for weighing, check weighing with LED limit indicators, and parts counting with fully selectable sample size or unit weight. Built tough for a variety of industries the GFK can meet the demands of warehouse, production floor or even medical applications.

Check weighing applications are trouble free with amber, green and red indicators to show the operator if the sample is under, over or within the preset limits. A solid stainless steel top pan provides ample weighing surface and a standard pillar allows easy mounting of the indicator if desired. The GFK includes an RS-232 interface with date and time, a bright backlit display with capacity tracker, a built-in rechargeable battery, and an external power supply.

With over three decades of experience in the production of weighing equipment you can trust Adam for quality products that offer a range of features designed for many different applications.

PERFECT BALANCE
Speed, Performance, Value

GFK Highlights:

LED indicators for easy recognition of underweight, overweight and acceptable limits makes check weighing applications quick and simple. Four LED's for each color can be programmed to turn on together to quickly indicate over/under weights, or in sequence for a more detailed indication.

A bright backlit display with capacity tracker is easy to read. The tracker shows the operator where they are in the weighing range, when using the tare function, to help prevent the user from exceeding the scale's capacity.

Full numeric keypad allows for preset tare functions and freely selectable sample size when in counting mode. The keypad and functions can be locked out by a supervisor if needed to stop settings from being changed.

The most flexible platform scale to meet today's demanding applications
Features
- Full range tare
- Stainless steel pan
- Accessible internal rechargeable battery
- Large backlit LCD display with capacity tracker
- Battery operation with auto-off to save battery life
- Parts counting with freely selectable sample sizes
- Check weighing LED lights to show acceptable limits
- Automatic accumulation
- Bi-directional RS-232 output for connection to computers and printers
- Adjustable feet
- Indicator can be mounted on enclosed pillar or optional wall mount

Applications
- Weighing
- Parts counting
- Percentage weighing
- Dynamic/Animal weighing
- Check weighing
- Check counting
