

Micro Beads

Microwavable Moist Heat Pack

- ➔ Helps relieve pain
- ➔ Provides soothing moist heat therapy
- ➔ Soft plush fabric provides a soothing touch

Effective Therapy

Micro Beads are a natural and effective method to help treat muscular aches and pains, arthritis, fibromyalgia, cramping, headaches and more. Packs can be warmed in a microwave to desired temperature and will remain warm for 20-30 minutes. Micro Beads adsorb moisture from the air and release it when heated, delivering warm penetrating relief.

Highest Quality

The plush fabric of Micro Beads is soft to the touch and gentle on skin. Made with high quality fabric and the finest stitching,

each pack is embroidered with the Core Products logo. Baffled channels help keep beads evenly distributed and packs easy to handle. Choose from three separate sizes. Use Micro Beads ACC520 for smaller applications; ACC521 to drape around neck and onto chest area; and ACC522 for back or larger areas.
