

Reflex Wrist Support

Comfortable Wrist Support For Active People

HOW TO BUY

- Helps provide relief from repetitive motion discomforts.
- Provides necessary rigidity to stabilize the wrist and forearm without eliminating range of motion.
- Ideal for weak or injured wrists and for pre/post surgery support.

Help for Injured Wrists

The Reflex Wrist Support is our most popular wrist support. It helps provide comfortable relief from repetitive motion discomforts. It is ideal for pre/post surgery support of carpal tunnel syndrome; and for sprains, strains, inflammation or

arthritic conditions. It also can be used as a preventative measure in high stress environments. Range of motion is restricted, but not eliminated.

Reflex Wrist Support

The Reflex Wrist support is created with the highest quality materials. The elastic wrist strap provides compression and support, while the open palm and adjustable thumb strap add flexibility and comfort. The molded flex pad eliminates the need for metal stays. The brace is six inches in length.

Specifications

Sizes

- Small - Fits 5.5 to 6.5" wrist
- Medium - Fits 6.5 to 7.5" wrist
- Large - Fits 7.5 to 8.5" wrist
- X-Large - Fits 8.5 to 9.5" wrist (Specify left or right)

Weight

- Single Brace - 6.6 ounces
