

We Know Our Weigh Around Baby Scales.

Did You Know We Make Carts, Too?

ROLLING

STAINLESS STEEL BABY SCALE CARTS

MADE IN USA

Detecto's model SPBT-1728 stainless steel rolling baby scale carts allow the weighing to come to the patient. The smooth gliding rubolene wheels and ideal size allow them to easily fit through doorways into patient rooms.

A lower shelf with three height adjustment levels allows clinical staff to store patient records and instruments onboard the cart. The spacious shelf space is the perfect size for baby scales, such as Detecto's model 6745 (pictured), which is battery operated for portability.

- Clinical grade wheels with 2 locking wheels to keep the cart in place.
- Made-in-USA quality.
- Durable stainless steel.
- Recessed top to keep the scale or other items securely in position.
- Adjustable, 3-position, lower shelf for storage.
- 2.5-inch-diameter heavy-duty rubolene wheels.
- Dimensions: 27.75 in W x 16.75 in D x 33.4 in H.
