

Bed Wedge

- ➔ Helps relieve symptoms of hiatal hernia and acid reflux, allowing a more comfortable night's sleep
- ➔ Helps reduce lower back, neck and shoulder pain
- ➔ Provides comfortable support for reading or watching TV

Treatment and Relief

The Bed Wedge is a convenient and natural solution for treating the symptoms of hiatal hernia. Used in conjunction with diet and exercise, the wedge is an effective and inexpensive alternative to surgery or medication.

The Bed Wedge can also help alleviate the pain and numbness sometimes caused by lying flat on the back. The gentle incline removes pressure from the lower back, shoulders and neck area, and places the lumbar spine in mild flexion.

Using the Bed Wedge to elevate legs also increases blood flow, aiding in relief of the pain and swelling due to poor circulation.

Comfort and Convenience

The Bed Wedge is a great support pillow for reading, surfing the internet, watching television or resting comfortably in bed. Constructed from precision cut, high quality foam and covered in a white sateen fabric with subtle striping, it's an attractive addition to any bedroom or living area. Zippered cover is removable and hand washable. Three height options allow the user to select the appropriate amount of lift to maximize comfort and relief. Our unique two-piece hinged design stores conveniently and ships less expensively.

Specifications

Product Selection:

- #LTC5507: Bed Wedge 7" x 24" x 24"
- #LTC5510: Bed Wedge 10" x 24" x 24"
- #LTC5512: Bed Wedge 12" x 24" x 24"

Color: White

Material: Polyurethane Foam, Cotton, Polyester, Nylon

Case Quantity:

- #LTC5507: 2
- #LTC5510: 1
- #LTC5512: 1

Case Dimensions: 15" x 14" x 22.5"

Product Weight:

- #LTC5507: 1.5 lbs. Case: 4 lbs.
- #LTC5510: 1.9 lbs. Case: 3 lbs.
- #LTC5512: 2.2 lbs. Case: 3 lbs.
