

THE 500KLHB

PRIMARY CARE DIGITAL SCALE WITH LIVE HANDLEBARS

The number-one-selling physician scale in North America, the all-digital Health o meter® 500KLHB primary care scale provides the optimum in quality, reliability, and ease of use. The unique live handlebars provide stability that many patients need, without affecting the accuracy of the weight reading. Designed to meet the needs of doctor's offices, hospitals, clinics, and acute and long-term care facilities, the scale features a built-in height rod in the scale column, a large non-skid platform, and reinforced base for added stability. The scale gives providers and patients an eye-level weight indicator for patients up to 660 pounds, with a user-friendly digital interface that includes BMI, hold/release, zero, tare, reweigh, recall, KG/LB, clear, and enter functions. The 500KL offers the best in its class extra-wide 8" wheelbase making transport easy. The exclusive Everlock® function allows the measuring unit (LB or KG) to be permanently locked on the scale.

The first healthcare scale to provide easy integration and seamless communication with today's EMR applications, the 500KLHB includes the option to add wireless connectivity to interface with a computer, EMR software, or other electronic device.

With its low platform height, the 500KLHB is easy to set up and offers patients a more comfortable and stable weighing experience.

THERE'S STRENGTH IN OUR NUMBERS.

When you add up the numbers on our scale, it's not surprising that the 500KLHB is the most widely used scale in physician offices nationwide.
