10+ FEATURES

Ear & Forehead Scan

Fingertip Heart Rate Monitor

Built-in Flashlight

Temperature Readout In 3 Languages

Reliability and Accuracy

The Ultra Pulse Ear & Forehead Thermometer is a versatile device that can be used to measure the temperature of a person's ear or forehead. It also has a built-in 15-second pulse/heart rate monitor and voice readings in 3 languages: English, Spanish, and French. A built-in flashlight makes it easy for caregivers to take temperature readings in the dark. The thermometer is easy to read with a backlit LED screen and a fever indicator. It can be used for everyone, from infants to adults, and is ideal for any home.

Key Features and Benefits:

- Dual Body Temperature Reading Methods in One Second (Ear or Forehead)
- Fingertip Heart Rate Monitor
- Built-in Flashlight To Avoid Disturbing Your Loved Ones
- Voice Temperature Readouts In 3 Languages; English, Spanish, and French
- Normal and High Fever Indicators
- Fast 1-Second Readout
- Large Backlit LED Screen
- Color LED Fever Indicator
- Memory Recall of Last 30 Readouts with Date & Time stamp
- Fahrenheit & Celsius Mode
- Current Room Temperature with Date & Time
